IT Intern

I'm an Informatics Engineering student who enjoys turning messy data into clear, decision-ready insights. At Toyota, I built production KPI dashboards (OEE, throughput, downtime, defects) with auto-refresh and simple drilldowns that teams used in daily standups. I'm comfortable with Python, SQL, Power BI, and Excel, and I can jump in on UI/UX and light full-stack work (HTML/CSS, JavaScript, Laravel, Vue, Node). Teammates know me for careful documentation and accuracy from shipping operations, and I like aligning KPI definitions and keeping solutions easy to maintain.

Skills

HTML/CSS	Expert
Figma	Expert
Power BI	Expert
Laravel	Skillful
Vue.JS	Skillful
Photoshop	Experienced
Excel	Expert
Python	Skillful
Javascript	Experienced
TailwindCSS	Expert
Bootstrap	Expert
NodeJS	Skillful
Git/Github	Experienced
PHP	Skillful
Attention to detail	Expert
Teamwork	Expert
Creative thinking	Expert
Fast Learner	Expert
Communication	Expert

Details

Nationality	Indonesian
Date / Place of birth	10 Januari 2004 Jakarta

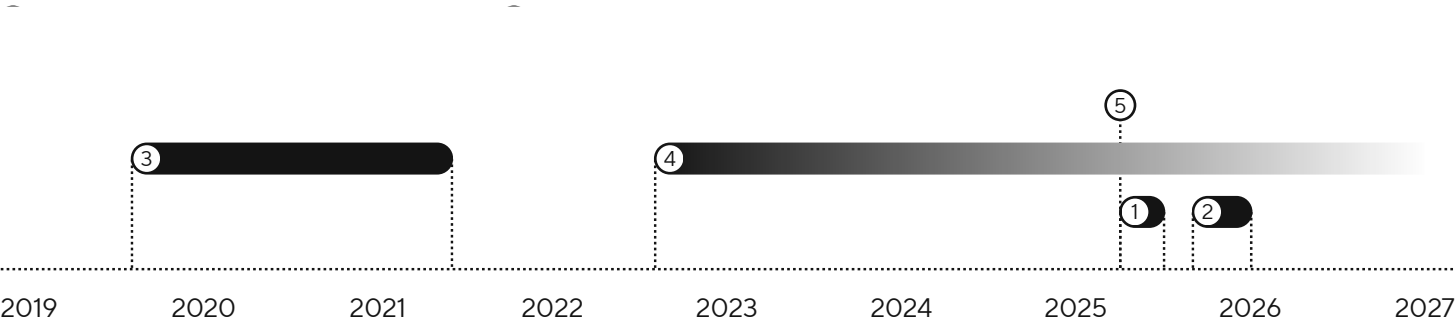

Languages

Bahasa Indonesia	Native speaker
English	Highly proficient

Employment History

Data Analyst Intern
PT. Toyota Motor Manufacturing
Indonesia, Karawang Barat
Apr 2025 – Jul 2025

- Built and maintained interactive production dashboards tracking core KPIs (OEE, throughput, downtime, defects) for the Production Department.
- Partnered with supervisors to define requirements and standardize KPI definitions, improving clarity and cross-line comparisons.
- Designed clean, readable visuals and drill-downs that enabled quick root-cause checks and daily stand-up reviews.
- Streamlined data preparation and refresh processes to keep dashboards easy to update and maintain.

Data Entry
PT. Hyper Mega Shipping,
Jakarta
Sept 2025 – Jan 2026

- Entered daily operational data into the system with high accuracy and attention to detail.
- Prepared weekly and monthly reports for internal stakeholders to support planning and tracking.
- Verified and reconciled documents, resolving discrepancies with relevant teams.
- Organized records and supported audit readiness and compliance under tight deadlines.

Education

③ Science
SMAN 109 Jakarta, Jakarta
Aug 2019 – Jun 2021

- Concentration in Natural Sciences (Mathematics, Physics, Chemistry).
- Built a strong analytical foundation; applied basic statistics and Excel to interpret lab and project data.
- Graduated June 2021.

④ Informatics Engineering
Universitas Singaperbangsa
Karawang, Karawang
Aug 2022 – Present

- Focus on programming fundamentals, data structures, database systems, and statistics for data analysis.
- Applied Python and SQL to clean, analyze, and visualize datasets; built concise dashboards with Power BI and Excel.
- Collaborated on team projects using Git and agile practices with emphasis on clear documentation and reproducibility.

Courses

⑤ Power BI
Toyota Indonesia Academy
Apr 2025
